Rob,

Thank you again for granting us an extension for our input on ideas to reduce greenhouse gases to meet AB 32 goals.

Per your request, we will follow up this submittal early next week with a letter that identifies the areas we cannot disclose publicly at this time for proprietary reasons. We also would be willing to meet with you and other CARB staff to discuss some of these issues.

Please let me know that you have received this document and let me know if you have any questions.

Sincerely,

Adrienne Alvord
Amyris Biotechnologies

If you can get it in before the end of the week that would be great.

Thanks again,
Rob

Mr. Robert Duvall
Air Pollution Specialist
California Air Resources Board

Dear Mr. Duvall,

I just spoke to you about the public input request for ideas to reduce greenhouse gases, and you indicated that you would be willing to allow extra time to submit ideas until the end of this week (Oct. 5th) if this time is needed.

Amyris Biotechnologies, a biotech start-up company based in Emeryville, CA, plans to submit a document and would like to request an extension of the deadline until the end of the week, though the company thinks it can get materials to you by Wednesday or Thursday. On behalf of Amyris Biotechnologies

I am requesting that you grant the company this extension of a few days, per our conversation.

I'd appreciate it if you would acknowledge receipt of this message and let me know if there is any problem with granting this request or if you need any further information in order to do so.

I appreciate your help. On behalf of Amyris, we look forward to participating in the scoping process beginning in November.

Sincerely,

Adrienne Alvord
on behalf of Amyris Biotechnologies
